Sectra, Linköping, Sweden, and Leica Biosystems, Shelton, Conn, have collaborated to develop an integrated digital pathology solution that will address the needs of enterprise-level clinical customers such as academic medical centers, clinical research organizations, and large hospital networks.

Integrated digital pathology solution

Background: Online "e-modules" integrated into medical education may enhance traditional learning. Medical students use e-modules during clinical rotations, but these often lack histopathology correlates of diseases and minimal time is devoted to pathology teaching.

Improving medical students' understanding of pediatric ...

TCGA clinical data contain key features representing the democratized nature of the data collection process. To ensure proper use of this large clinical dataset associated with genomic features, we developed a standardized dataset named the TCGA Pan-Cancer Clinical Data Resource (TCGA-CDR), which includes four major clinical outcome endpoints.
