Digital Image Processing means processing digital image by means of a digital computer. We can also say that it is a use of computer algorithms, in order to get enhanced image either to extract some useful information. Image processing mainly include the following steps: 1.Importing the image via image acquisition tools;

This book offers a good introduction to both digital signal processing and image processing all in the same book. This allows engineering students to "think outside the box" pushing them from 1 to 2 dimensions. Bose does a good job by including a two-dimensional processing section at the end of almost every chapter.
