The fifth edition of this book deals with the new 9.3.2 and 8.4.7 versions of BIND as well as older versions of BIND 8 and 9. While 9.3.2 and 8.4.7 are the most recent versions as of this writing, they haven't made their way into many vendors' versions of Unix yet, partly because both versions have only recently been released and many vendors are wary of using such new software.

Preface - DNS and BIND, 5th Edition [Book]

DNS NOTIFY (Zone Change Notification) (DNS and BIND, 4th Edition) 10.3. DNS NOTIFY (Zone Change Notification) Traditionally, BIND slaves have used an polling scheme to determine when they need a zone transfer. The polling interval is called the refresh interval. Other parameters in the zone's SOA record govern other aspects of the polling mechanism.

The name of the BIND 8 IXFR log file, by default, is the name of the zone data file with .ixfr appended to it. BIND 9 name servers use the dynamic update log file, or journal file, to assemble IXFR responses and to maintain the integrity of the zone. Since a primary master name server never knows when it may need the record of a particular ...
