Locative media or location-based media (LBM) are media of communication functionally bound to a location. The physical implementation of locative media, however, is not bound to the same location to which the content refers. Location-based media delivers multimedia and other content directly to the user of a mobile device dependent upon their location. . Location information determined by ...

Locative media - Wikipedia

Locative media attaches digital media to global positioning satellite (GPS) coordinates accessed by mobile communication technologies. Locative media is an artistic sub-branch of ubiquitous computing research initiated at a "Mapping the Zone" workshop held at RIXC in Riga, Latvia, 2003. Its early practitioners, such as Marc Tutters and Karlis Kalnins, were interested in the relationship ...

What is Locative Media | IGI Global

These locative media experiences may delve "into" the historical surface of a space to reveal past events or stories (whether fictional, confessional or standing on consensus as factual). Locative media experiences may also cross space, connecting experiences across short or long geographic, experiential, or temporal distances.

Language is always evolving. New slang becomes popular as older terms fade into obscurity. And in the age of the Internet, the process often happens more quickly than it used to, which can make it difficult to keep up with the current vernacular. In this guide we'll look at the word lit, its history, and what it means today.
