Motor performance is the ability to perform a motor task. Motor learning is to have a carryover between one movement pattern and other functional movement patterns. I think many people often use external feedback (visual/tactile/auditory) too much and don't teach clients how to access their internal senses (proprioceptive-kinesthetic sense) to learn how they're moving.

Performance

- Performance is tangible and measurable while learning is a process that is intangible.
- Learning leads to a better performance in most situations, in our lives, and even our education system is based upon the belief that learning improves performance.
- Learning is a continuous process while performance can be produced when required.

Difference Between Learning and Performance | Compare the ...

Motor learning is a subdiscipline of motor behavior that examines how people acquire motor skills. Motor learning is a relatively permanent change in the ability to execute a motor skill as a result of practice or experience. This is in contrast to performance, the act of executing a motor skill that results in a temporary, nonpermanent change.
