Read Book Negative Edge Pool Construction Manual

The problem is exacerbated if the catch pool is too small for the pool it supports, adds Spencer White, owner, Cascade Pools, Lake Oswego, Ore., another veteran of vanishing-edge construction. Cascade Pools builds catch pools with automatic fills that maintain the water level and skimmers to keep heavy debris from finding its way into the plumbing.

Avoiding the Pitfalls of Vanishing-Edge Pool Construction ...

A negative edge pool is a pool with a “missing edge.” Basically the negative edge pool has a portion of its “rim” missing. The pool has a complete foundation and a continuous “side” all around, but there is some edge designed out of the perimeter.

Common problems associated with negative edge pools ...

Since then, we have tested several other edge pools. One is a vanishing-edge/rim-flow combination in coastal North San Diego County with a 6-foot-high fieldstone edge wall. We calculated this pool at more than 3 inches of evaporative loss per week. At that point, I started to realize just how much more chemical consumption there was as well.

Inground Vinyl Pools: Infinity or Negative Edge ...

A Negative Edge Pool features one or more walls that come to water level rather than above it. The overflowing water falls into a catch pool – a sort of basin that sits beneath the negative edge. The water is collected and pumped back into your main pool. Negative Edge Pools are available on all pools.

NEGATIVE EDGE POOLS - Largest in-ground fiberglass pool ...

The system would fill the trough (which also was too narrow) as the leveler indicated, but because the device was set at the top, the basin overflowed when the edge pump came on or bathers entered the water, thereby flooding the basin and giving the slope below the pool a good soaking. In our vanishing-edge projects, we use a leveling system ...

Vanishing Edge Pools: Problems and Solutions | Pools/Spas ...

Negative-side protection has become more important with the popularity of vanishing-edge pools. “We’ve learned that a lot of glass tile failures have to do with water coming through from the backside of the pools, pulling contaminants from the concrete and mortar beds along with it and [building up] calcium deposits and efflorescence around ...
