Start with 0.5 g/kg/day and advance daily by 0.5 g/kg/day to a maximum of 2.5 - 3 g/kg/day. Monitor BUN (try to keep the BUN below 18) and bicarbonate (try to maintain above 20). Acetate : Converted by the liver to bicarbonate. The dose is based on the bicarbonate value from daily electrolytes.

NICU Survival Guide: Fluids, Electrolytes and Nutrition

The NICU Survival Card is a title first authored by Dr. Dressel in 1993. It has been evolving ever since until it became such a useful tool for NICU staff that it finally was given the superlative 'Ultimate' in 2010 with it now printed for a 4th addition. It is a compendium of 67 of the most used medications in the NICU along with dosage ranges and intervals.
