INSTRUCTION MANUAL Orion SpaceProbe 130ST EQ

Collimating is the process of aligning a telescope's optics. Your StarMax or Apex's primary mirror was aligned at the factory and should not need adjustment unless the telescope is handled roughly.This manual contains information on how to test the collimation of your telescope and instructions for proper alignment should that be needed.

Collimating Orion StarMax and Apex Maksutov-Cassegrain ...

The polished 45A° internal surface projects an annulus of light into the optical path to facilitate primary mirror alignment. Simply insert the Collimating Eyepiece in the focuser drawtube and follow normal collimation steps. Your Newtonian will always be in excellent optical alignment!

Orion Collimating Eyepiece - telescopes.net

The Cheshire and cap show things a bit off centre after laser collimation, so a bit of fine tuning is needed. Perhaps this laser collimator needs collimation too, but it is at least better aligned than the first that was sent. The laser is good for a quick but imperfect collimation, and fast-tracks me to the fine-tuning I do with the Cheshire.
