A fundamental skill of professional seamanship is being able to maneuver a vessel with accuracy and precision. Unlike vehicles on land, a ship afloat is subject to the movements of the air around it and the water in which it floats. Another complicating factor is the mass of a ship that has to be accounted for when stopping and starting.

It thus embraces every aspect of a ship's life in port and its progress at sea. Seamanship, however, has also a narrower meaning. It is that area which is concerned with the rest of a ship's daily management and safe handling: its gear, boats, anchors and cables, rigging; its sails if it is a sailing vessel, and the organization of a watch kept at sea and in harbour.
