O. Prum ...

RP: Aesthetic evolution is a process that involves a sensory perception, a cognitive evaluation, and some kind of social or sexual choice. And when these three things come together with some kind of heritable substrate or genetic or cultural substrate, then the result is a distinct kind of evolution that I have called aesthetic evolution.

Evolution of Beauty

Online Library The Evolution Of

Beauty How looks at the theory of Sexual Selection from the idea proposed by Darwin to our current day synthesis of ideas. The book argues for re-elevating this mechanism to the prominence that it deserves. However, I would argue that among many who have studied evolution, it has held such a position for many years.
