Abstract. This paper summarizes and integrates research concerned with a long-neglected topic in psychology: the relationship between conscious goals and intentions and task performance. The basic promise of this research is that an individual's conscious ideas regulate his actions. Studies are cited demonstrating that: (1) hard goals produce a higher level of performance (output) than easy goals; (2) specific hard goals produce a higher level of output than a goal of "do your best"; and ...

About Locke and Latham's Theory. In the late 1960s, Locke's pioneering research into goal setting and motivation gave us our modern understanding of goal setting. In his 1968 article "Toward a Theory of Task Motivation and Incentives," he showed that clear goals and appropriate feedback motivate employees. He went on to highlight that working toward a goal is also a major source of motivation - which, in turn, improves performance.
